

FTGAP07

A combination of extra alkaline agents (gas) that, when applied to the substrate containing hydrogen cyanide, neutralizes it without generating environmental impact.

Its function is to neutralize sodium cyanide (NaCN) in contaminated soil and water.

TECHNICAL SPECIFICATIONS	
APARIENCIA	Translucent liquid
OLOR	Strong odor
SEDIMENTACIÓN	None
рН	13 - 14
pH DE TRABAJO	11
GRAVEDAD ESPECÍFICA	1.2.
SOLUBILIDAD	In all proportions
APLICACIÓN	Cyanide neutralizer
DOSIFICACIÓN	0.5-1 L per 1 MT of mineral

TECHNICAL SPECIFICATIONS	
INGREDIENTES ACTIVOS	Products with alkaline bases
PRESENTACIÓN	25-liter drum.50-liter drum.200-liter drum.1000-liter isotank.
OBSERVACIÓN	Read the usage protocols before applying.
PRECAUCIONES	 Do not mix the product with other substances Read the reagent's SDS before use. Wear gloves, protect your eyes, and use in well-ventilated areas. Observe industrial safety regulations.
FECHA DE REVISIÓN	03/25/2025

Created with environmental benefits and human health in mind.

AXXION products are guaranteed to be harmless to nature and humans.

We work for sustainable mining

GOLDEN AXXION is a company that seeks high levels of value for the entire mining development chain, always ensuring respect and preservation of the different manifestations of life.
